

Be Aware **in motion**

Transforming Insurance with **AI-Driven Customer Experience**

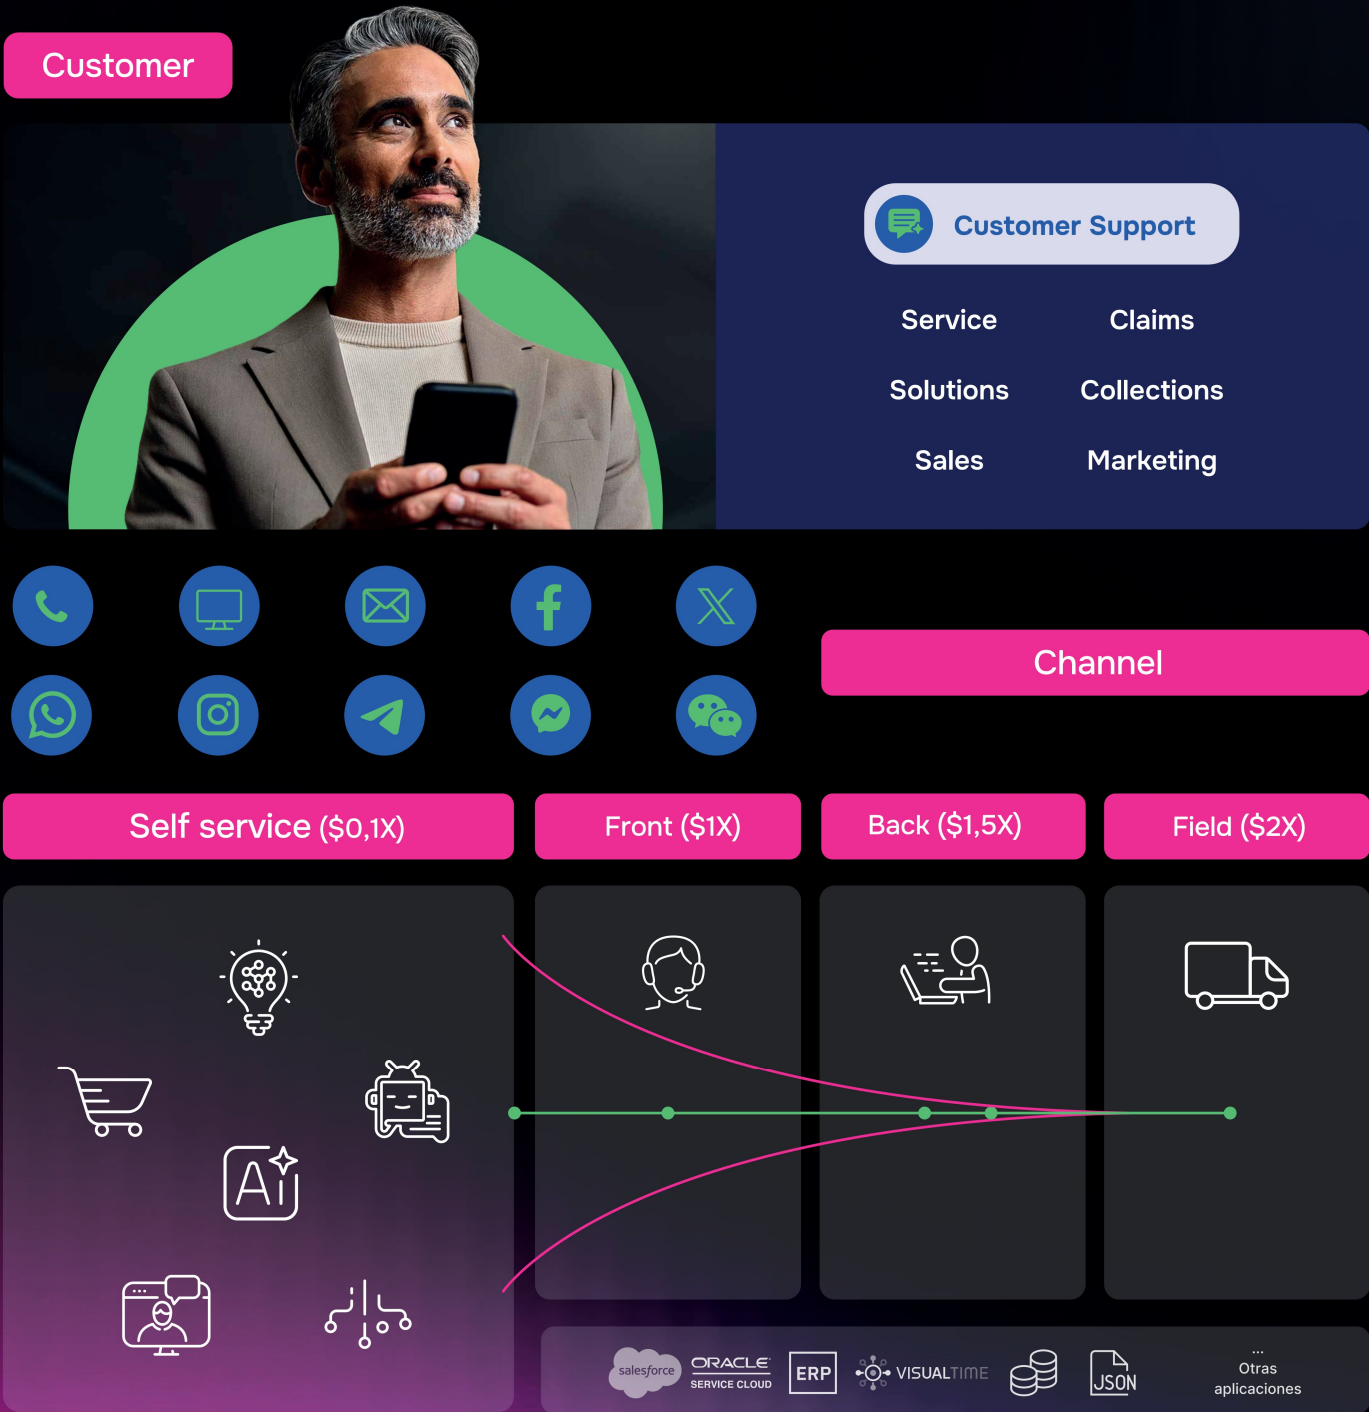

USA • México • Costa Rica • Colombia • Brasil • Argentina • Chile

Be Aware is the ecosystem that integrates all your channels into a single platform, connecting data, processes, and teams to turn every interaction with your customers into growth.

With predictive artificial intelligence, real-time data visualization, and local support, it allows you to anticipate needs, execute with agility, build customer loyalty, and accelerate your sales.

End to End Insurance CX

Be Aware: Powering the Intelligent Insurance Revolution

"Be Aware is the key to transforming insurance operations into an intelligent, agent-driven ecosystem – the best choice for insurers ready to adopt Agentic AI and unlock a new era of operational efficiency."

Five Advantages of Agentic AI in Insurance

- 1. Operational Efficiency** – Automates repetitive processes and reduces manual workloads, enabling teams to focus on strategic decisions.
- 2. Proactive Decision-Making** – Anticipates customer needs and market changes, allowing insurers to act before issues arise.
- 3. Seamless Customer Experience** – Provides real-time, personalized interactions that improve satisfaction and loyalty.
- 4. Cost Optimization** – Reduces operational costs by streamlining claims management, underwriting, and policy administration.
- 5. Scalable Innovation** – Creates a foundation for continuous improvement, easily adapting to new business models and regulations.

"With Be Aware, insurers can move beyond traditional digitalization to embrace Agentic AI – creating smarter, faster, and more adaptive operations. The future of insurance isn't just digital; it's intelligent, autonomous, and built with Be Aware."

Be Aware: The Future of Customer-Centric Insurance with No-Code Power

Top Five Pros of Be Aware No-Code/Low-Code

- 1. Speed to Market** – Build and launch tailored insurance solutions in days instead of months.
- 2. Customer-Centric Flexibility** – Easily adapt experiences to evolving customer needs.
- 3. Cost Efficiency** – Reduce development and IT dependency, lowering operational expenses.
- 4. Agility & Innovation** – Rapid prototyping and iteration enable insurers to test and scale new models.
- 5. Empowered Teams** – Business users can design solutions without needing advanced technical expertise.

Be Aware empowers insurers to innovate at the speed of their customers. By combining no-code/low-code agility with customer-driven design, it transforms insurance operations into a flexible, efficient, and scalable ecosystem. With Be Aware, insurers are not just keeping pace with change – they're leading it.
