

VisualTIME

is a leading insurance core platform, with the most comprehensive functionality and more than 45 active implementations across insurers throughout the Americas.

Its adaptability, combined with straightforward configuration, enables the management and administration of any business model: B2C, B2B and B2BC across Life, P&C, and Health LOBs. The platform supports the definition of your company's specific attributes throughout the entire insurance value chain, from start to finish.

Comprehensive Value Chain Support

VisualTIME is composed of 16 integrated modules that cover essential back-office processes while enabling digital and omnichannel interactions with stakeholders and customers, ensuring enhanced customer experience.
